

ABSTRACT OF THE DISCLOSURE

A combination drink bottle, snack package and envelope provides a cylindrical bottle wall joined axially with a diminished diameter bottle neck, which terminates at a removable bottle cap. The sealed snack package contains a snack food adapted for being wrapped around for over the bottle neck for intimate abutment therewith. The envelope has a cylindrical envelope wall terminating with an aperture at one end thereof, the aperture adapted for accepting the bottle neck and for positioning an inner surface of the envelope wall intimately against the bottle wall for securement therewith, the envelope further enabled for pressing the snack package against the bottle neck, the envelope wall extending diametrically from the bottle wall no more than by the thickness of the envelope wall.
